

Registration form for fertilisers and soil improvers etc.

Fill out table 1, 2 and 3 in this form as part of the registration process of your fertiliser or soil improver etc. You can see the requirements for your product type in the Executive Order on fertiliser and soil improvers etc. (nr. 862 af 27. august 2008 om gødning og jordforbedringsmidler m.v.).

If a mandatory information point is missing in table 1 and table 2, you can add the information in table 3.

When you have filled out the form, you must mail it along with a draft of the marking that is intended for the product to jordbrugskontrol@lbst.dk.

Table 1. Basic product information

Product information	
Product name	
Type, e.g. "NPK-gødning"	
Denotation, e.g. "NPK-gødning 14-3-15 m. S(4)"	
(Only fertilisers)	
EF-fertiliser (y/n)	
Total nitrogen content (N) in pct.	
Total phosphor content (P) in pct.	
Total potassium content (K) in pct.	
Liquid fertiliser (y/n)	
Storage temperature for liquid fertilisers	
Degree of utilisation	
Safety group	
Product origin (all products)	
Seller	
Seller's adress	
Country of production	
Place of production	
Country of product material origin	
Importer	
Producer	
Packaging company	
Manufacturing method	
Contact information	
VAT-no /organisation-no.	
Contact person (name)	
Contact person phone number	
Contact person e-mailadress	
E-mailadress for invoices	

Product content –nutrients

Fill out table 2 with information regarding the nutrient content in your product. Leave any fields empty for nutrients, which your product does not contain. Remember to state the unit of the content in accordance to your product type.

Table 2. Nutrients

Nutrients		Unit
Nitrogen (N)		
Total nitrogen (N)		
Ammoniacal nitrogen (N)		
Nitric nitrogen (N)		
Ureic nitrogen (N)		
Watersoluble nitrogen (N)		
Phosphor (P)		
Phosphorus (P) soluble in water and citrate (neutral ammonium citrate)		
Water-soluble phosphorus (P)		
Phosphorus (P) soluble in citrate (alkaline ammonium citrate)		
Phosphorus (P) soluble in mineral acids		
Potassium (K)		
Water-soluble potassium (K)		
Secondary and micro nutrients		
Calcium (Ca)	Total	
	Water-soluble	
Magnesium (Mg)	Total	
	Water-soluble	
Sodium (Na)	Total	
	Water-soluble	
Sulphur (S)	Total	
	Water-soluble	
Boron (B)	Total	
	Water-soluble	
Cobalt (Co)	Total	
	Water-soluble	
Copper (Cu)	Total	
	Water-soluble	
Iron (Fe)	Total	
	Water-soluble	
Manganese (Mn)	Total	
	Water-soluble	
Molybdenum (Mo)	Total	
	Water-soluble	
Zinc (Zn)	Total	
	Water-soluble	

Product content – more information

Fill out table 3 with other mandatory information regarding your product. Leave a field blank if an information point is irrelevant (not mandatory) for your product. Remember to state the unit of the content in accordance to your product type.

Table 3. More information

More information		Unit
Particle size		mm
Neutralising capacity		pct.
Reactivity number		
Maximum content of ash in the dry matter		pct.
pH value		
Peatship, stated in grams of dry matter per litre of saturated peat		g/L
Dry matter content		pct.
Organic matter in the dry matter		pct.
Conductivity		
Content of viable seed and viable plant parts		Antal/L
Content of visible impurities > 2 mm		pct.
Content of stones > 5 mm, where applicable		pct.

Product content – other information and optional information points

If there is other mandatory information for your product according to the fertiliser regulations, you must state the information points in table 4. Examples may be other nitrogen forms, product materials in organic fertilisers, microorganism concentrations etc.

Table 1. Other information

Other information or optional information		Unit
Evt. bemærkninger
